**Comments It seems that in this proposal there is going to be a TRO on the byways AMES12 and AMES11 surrounding the development. I must object to this because these are a link north to south between other parts of the rights of way network. Without these byways trail riders such as myself on small engined motorcycles will have to brave the busy main roads and all the hazards that go with them. It will also add considerable mileage to our journeys. Not very eco friendly.**

**Also, a point to note, is that without vehicular use, these byways will quickly become overgrown and completely unusable. These routes are as much a part of our heritage as Stonehenge itself. They are and always have been vehicular routes and to close them will change their character forever.**
